5% PREVALENCE OR 1 IN 20
IBS is common and affects about 5% of the population in the U.S. or about 1 in 20 people

#1 PAIN
Abdominal pain is the major symptom of IBS

QUALITY OF LIFE
IBS greatly reduces patients’ quality of life

$1.5 BILLION TO $10 BILLION PER YEAR
Direct medical costs of IBS are high, not including Rx or over-the-counter medications

10 TO 15 YEARS OF LIFE
A majority of IBS patients would give up 10 to 15 years of life expectancy for an instant cure for their condition

EQUAL OPPORTUNITY
IBS is not just found in women, it’s an “equal opportunity” disorder and impacts men too

TYPES OF IBS
- IBS-C: IBS with constipation
- IBS-D: IBS with diarrhea
- IBS-Mixed: IBS with mix constipation and diarrhea

BLOATING
The sense of bloating is a common symptom of IBS

IBS is considered a DISORDER OF GUT-BRAIN INTERACTION

HOPE
IBS symptoms can be frustrating and discouraging, but there is hope and there are treatment options:
- diet
- over-the-counter medications
- prescription medications
- gut-directed therapies like cognitive behavioral therapy and hypnotherapy

When you TALK TO YOUR DOCTOR, make sure you bring your list of symptoms and questions
